Drier air spreads across the Great Basin from the west on Monday with only isolated thunderstorms possible in eastern Utah and western Wyoming. An extended drying trend moves in for the remainder of the work week and into the weekend across the Geographic Area.

Winds increase over parts of central and eastern Idaho by mid-week which could further stir up holdovers from recent lightning.

Fuels/Fire Potential:

... Fuels and Fire Behavior Advisory in effect for Utah, the Arizona Strip and Southern/Eastern/Central Nevada ...

The upcoming hot and dry weather this week will cause fire danger indices to increase regionwide back to the 90th-97th percentile in many areas, especially Utah. Fuels will also continue to dry over Idaho and Nevada this upcoming week as hot and dry weather continues.
